

# Czech Digital Mathematics Library

powered by  
DSpace & Manakin

## DML-CZ

The aim of the **DML-CZ** project is to ensure availability of mathematical literature which has been published throughout history in the Czech lands.

## Partners

- ▶ Academy of Science of the Czech Republic
- ▶ Masaryk University, Brno
- ▶ Charles University, Prague

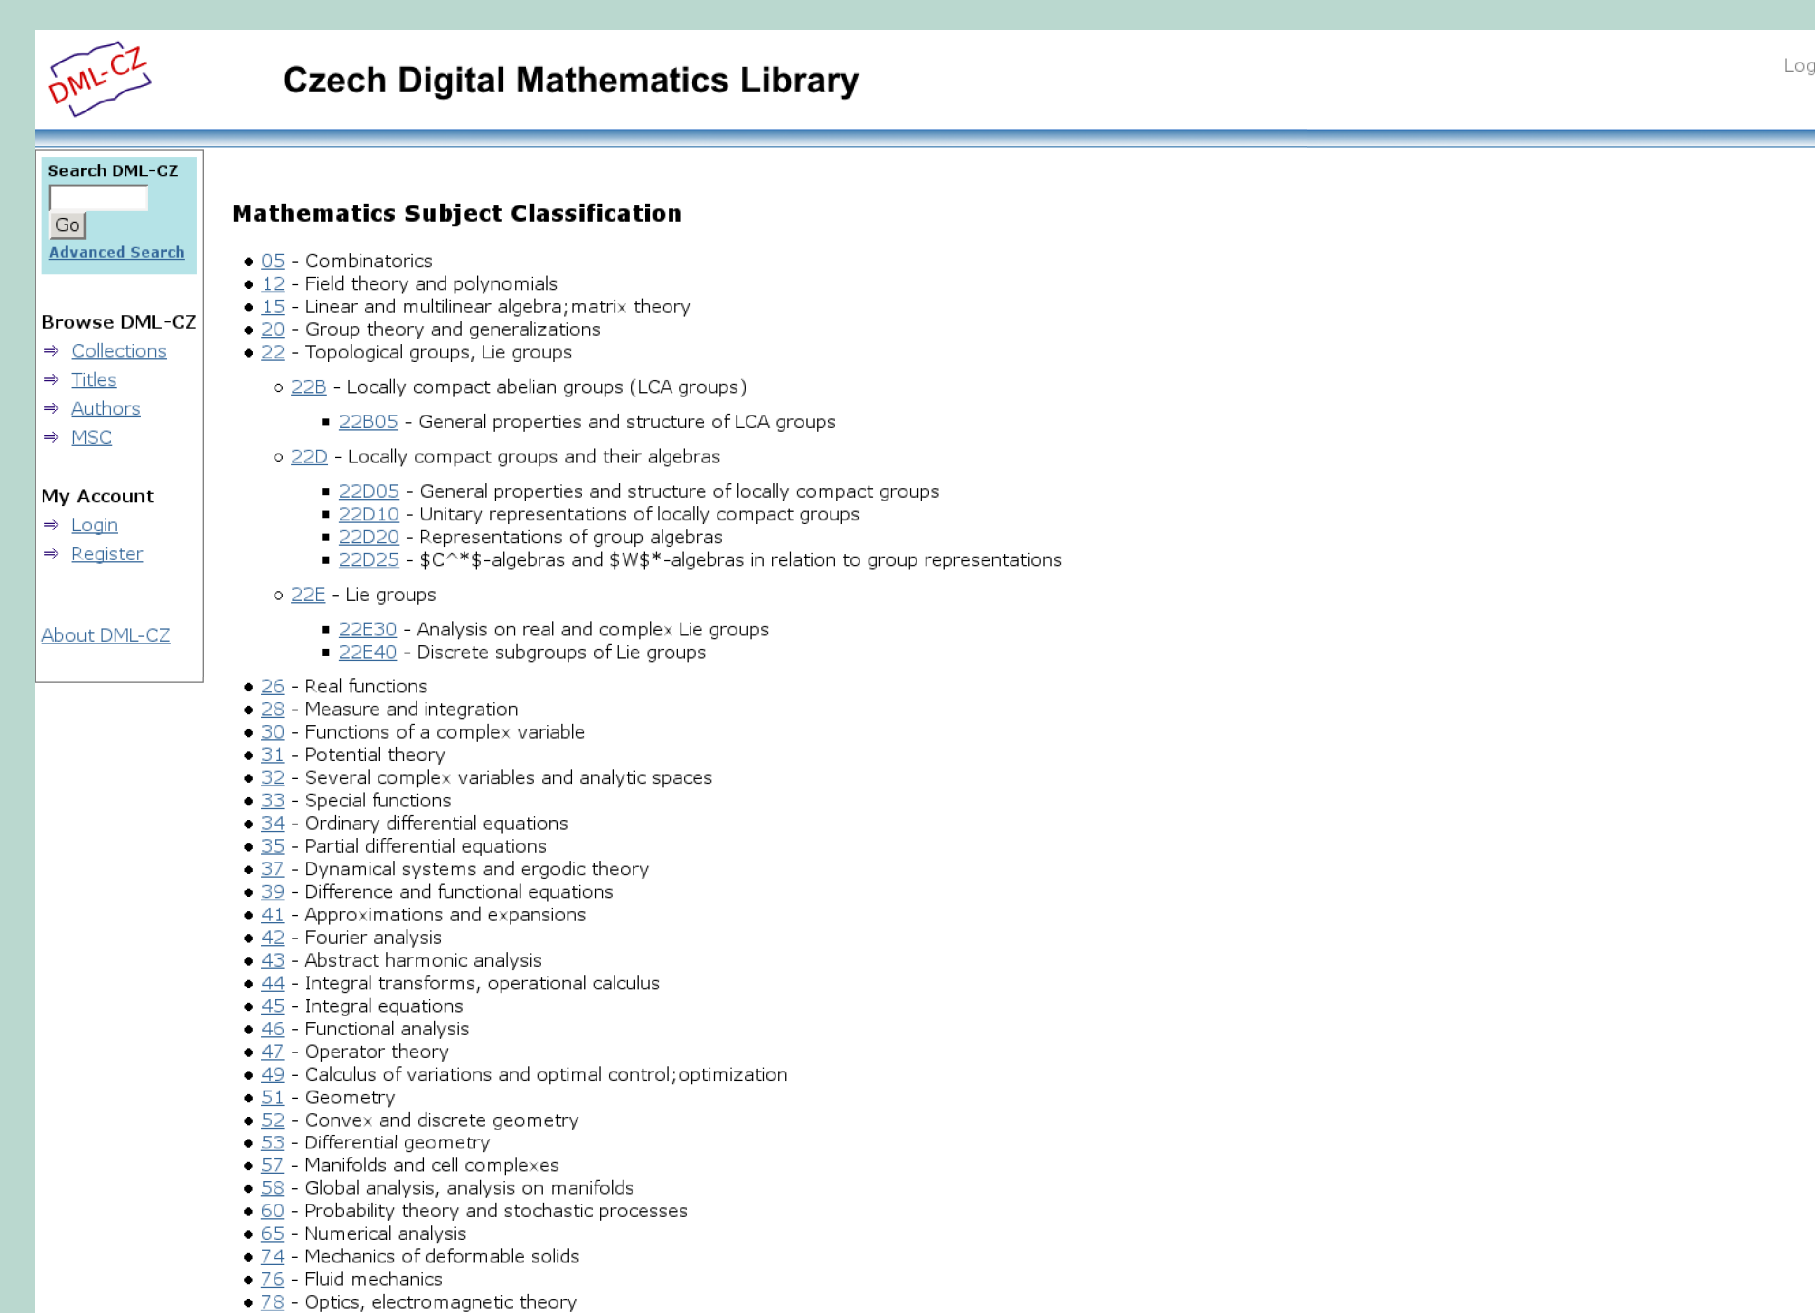

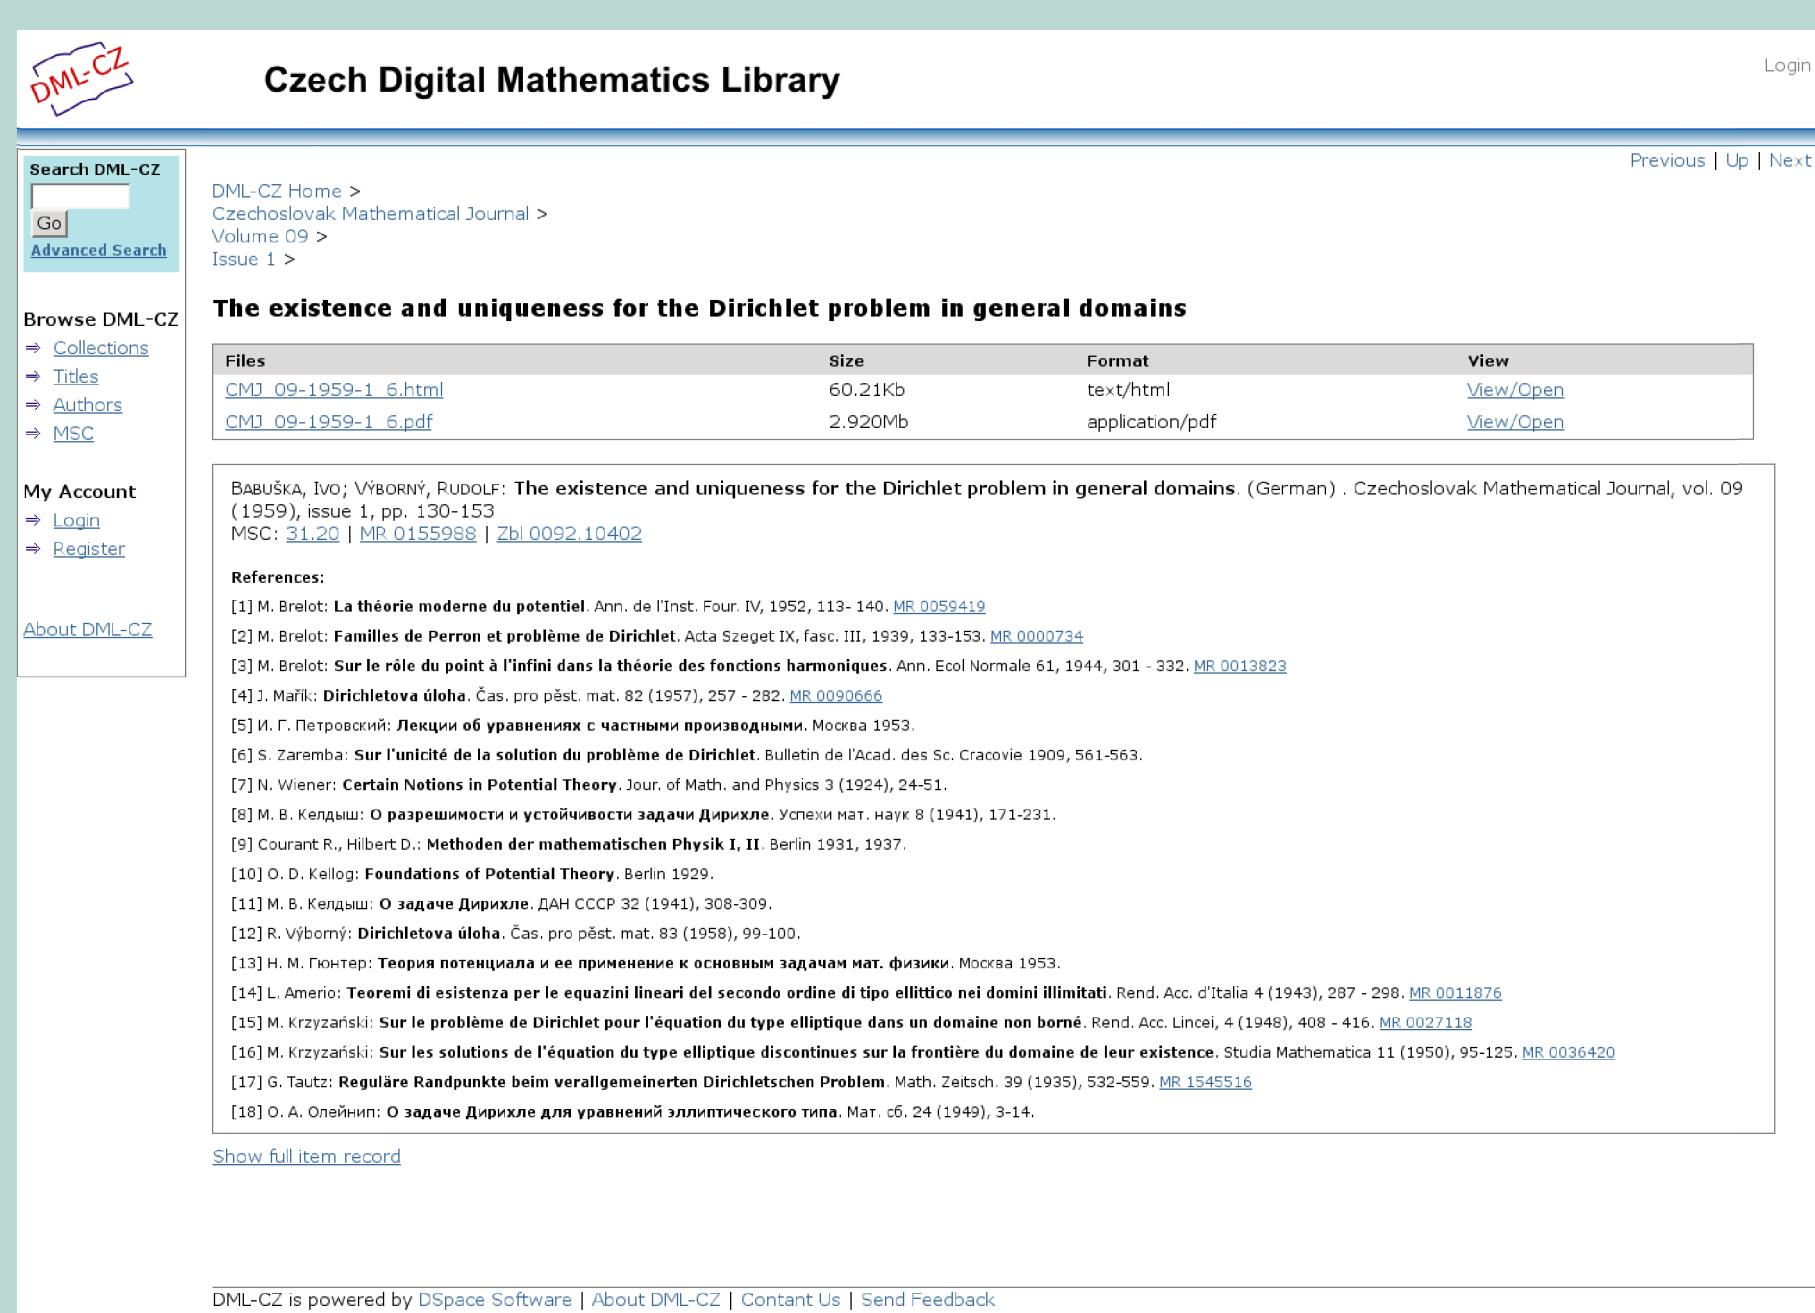

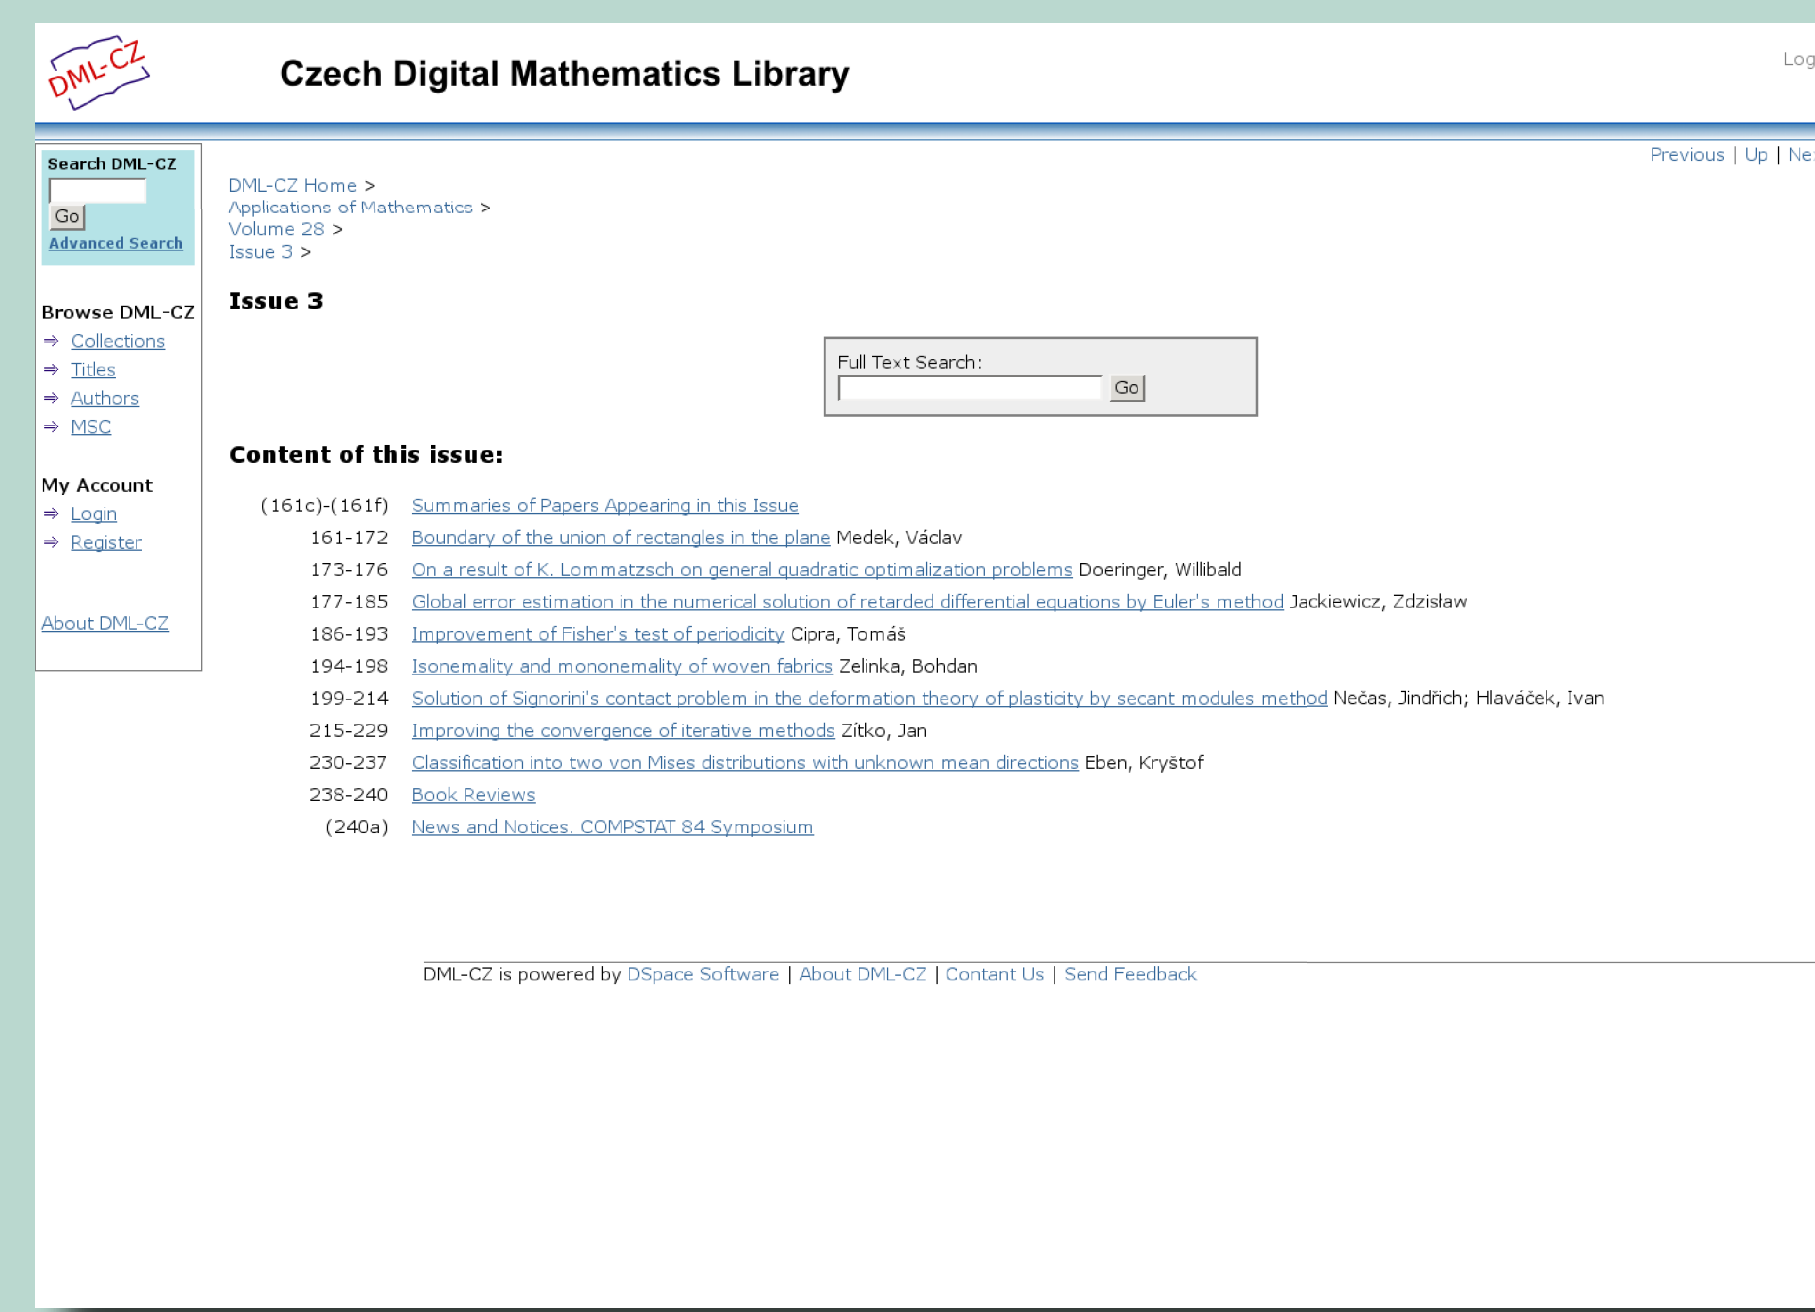

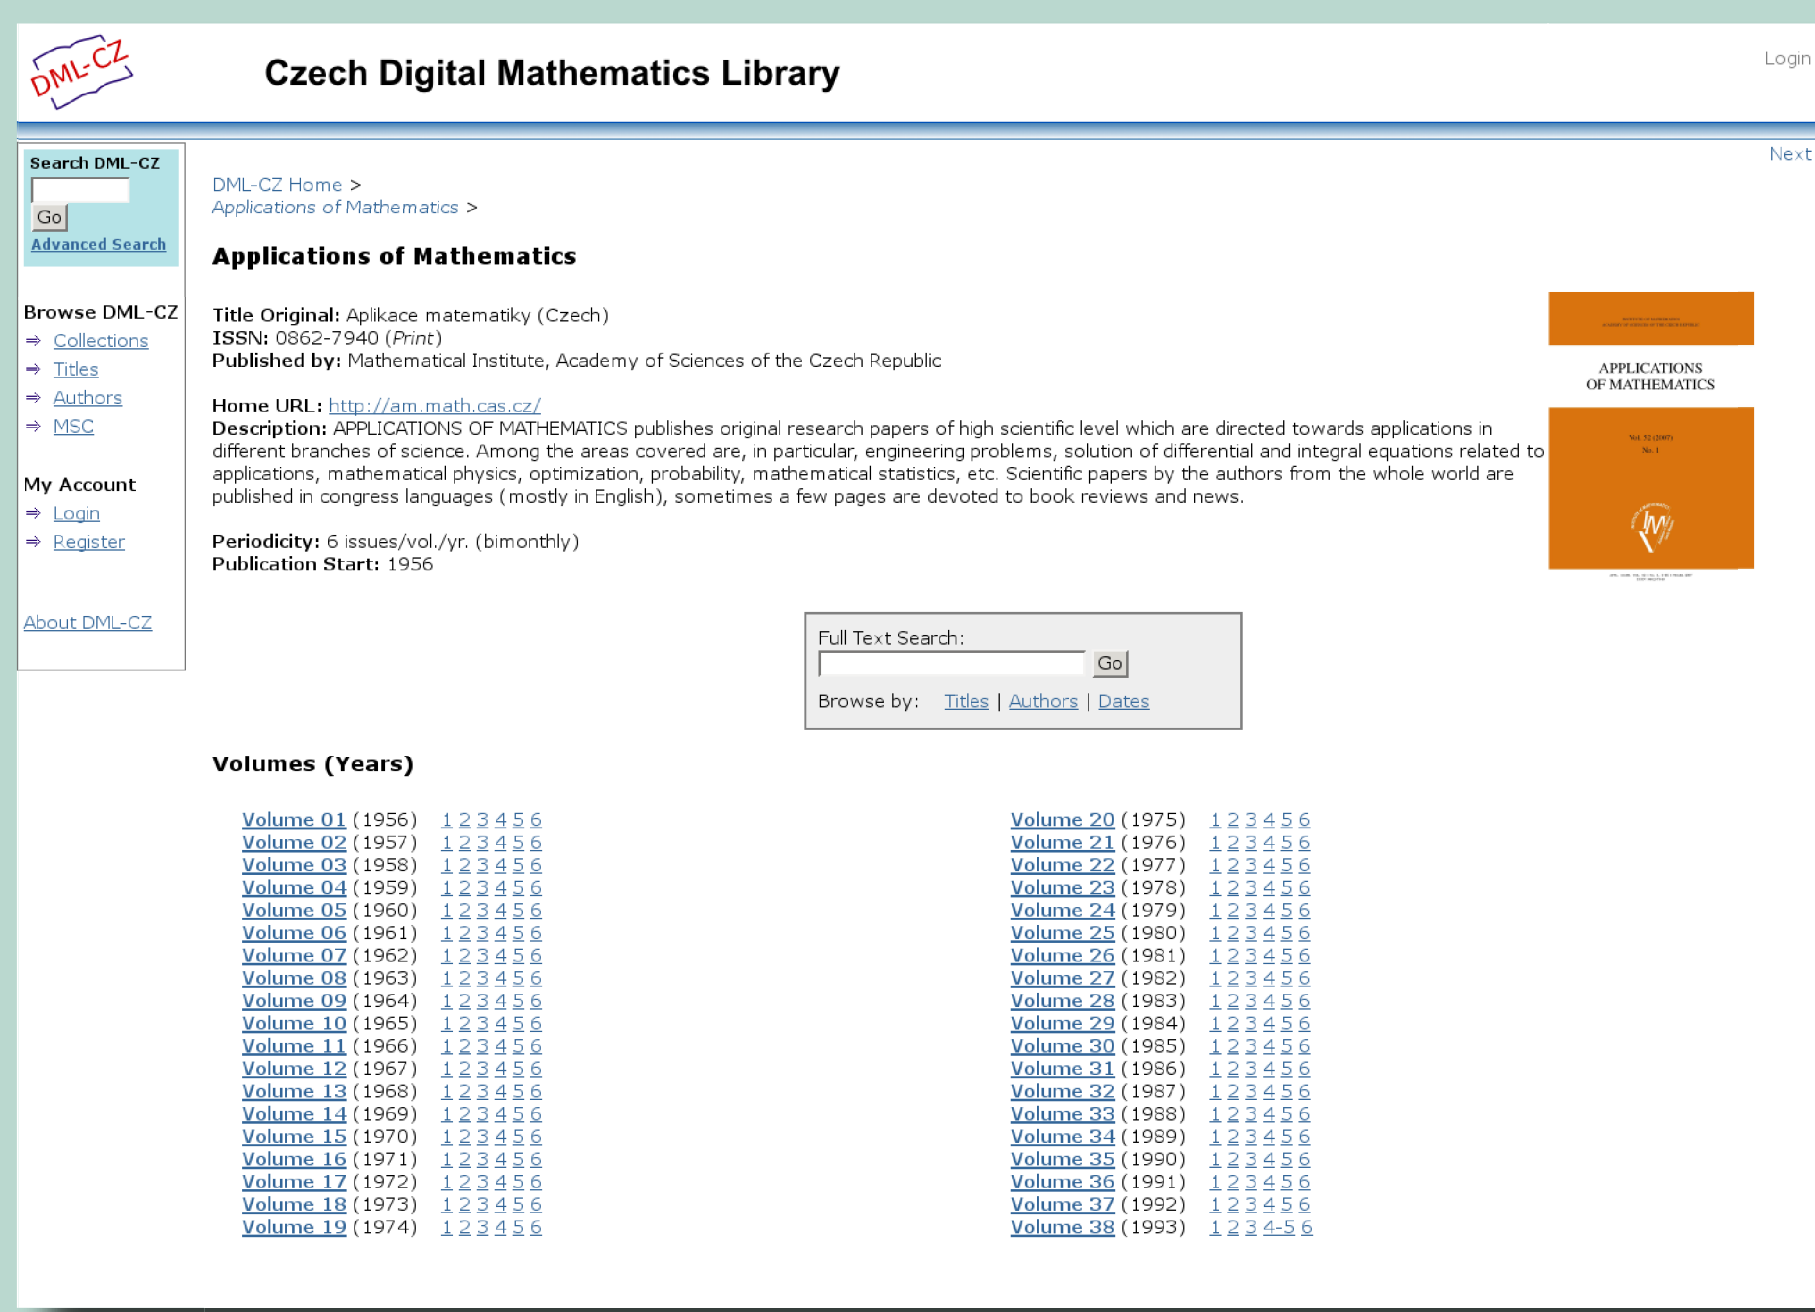

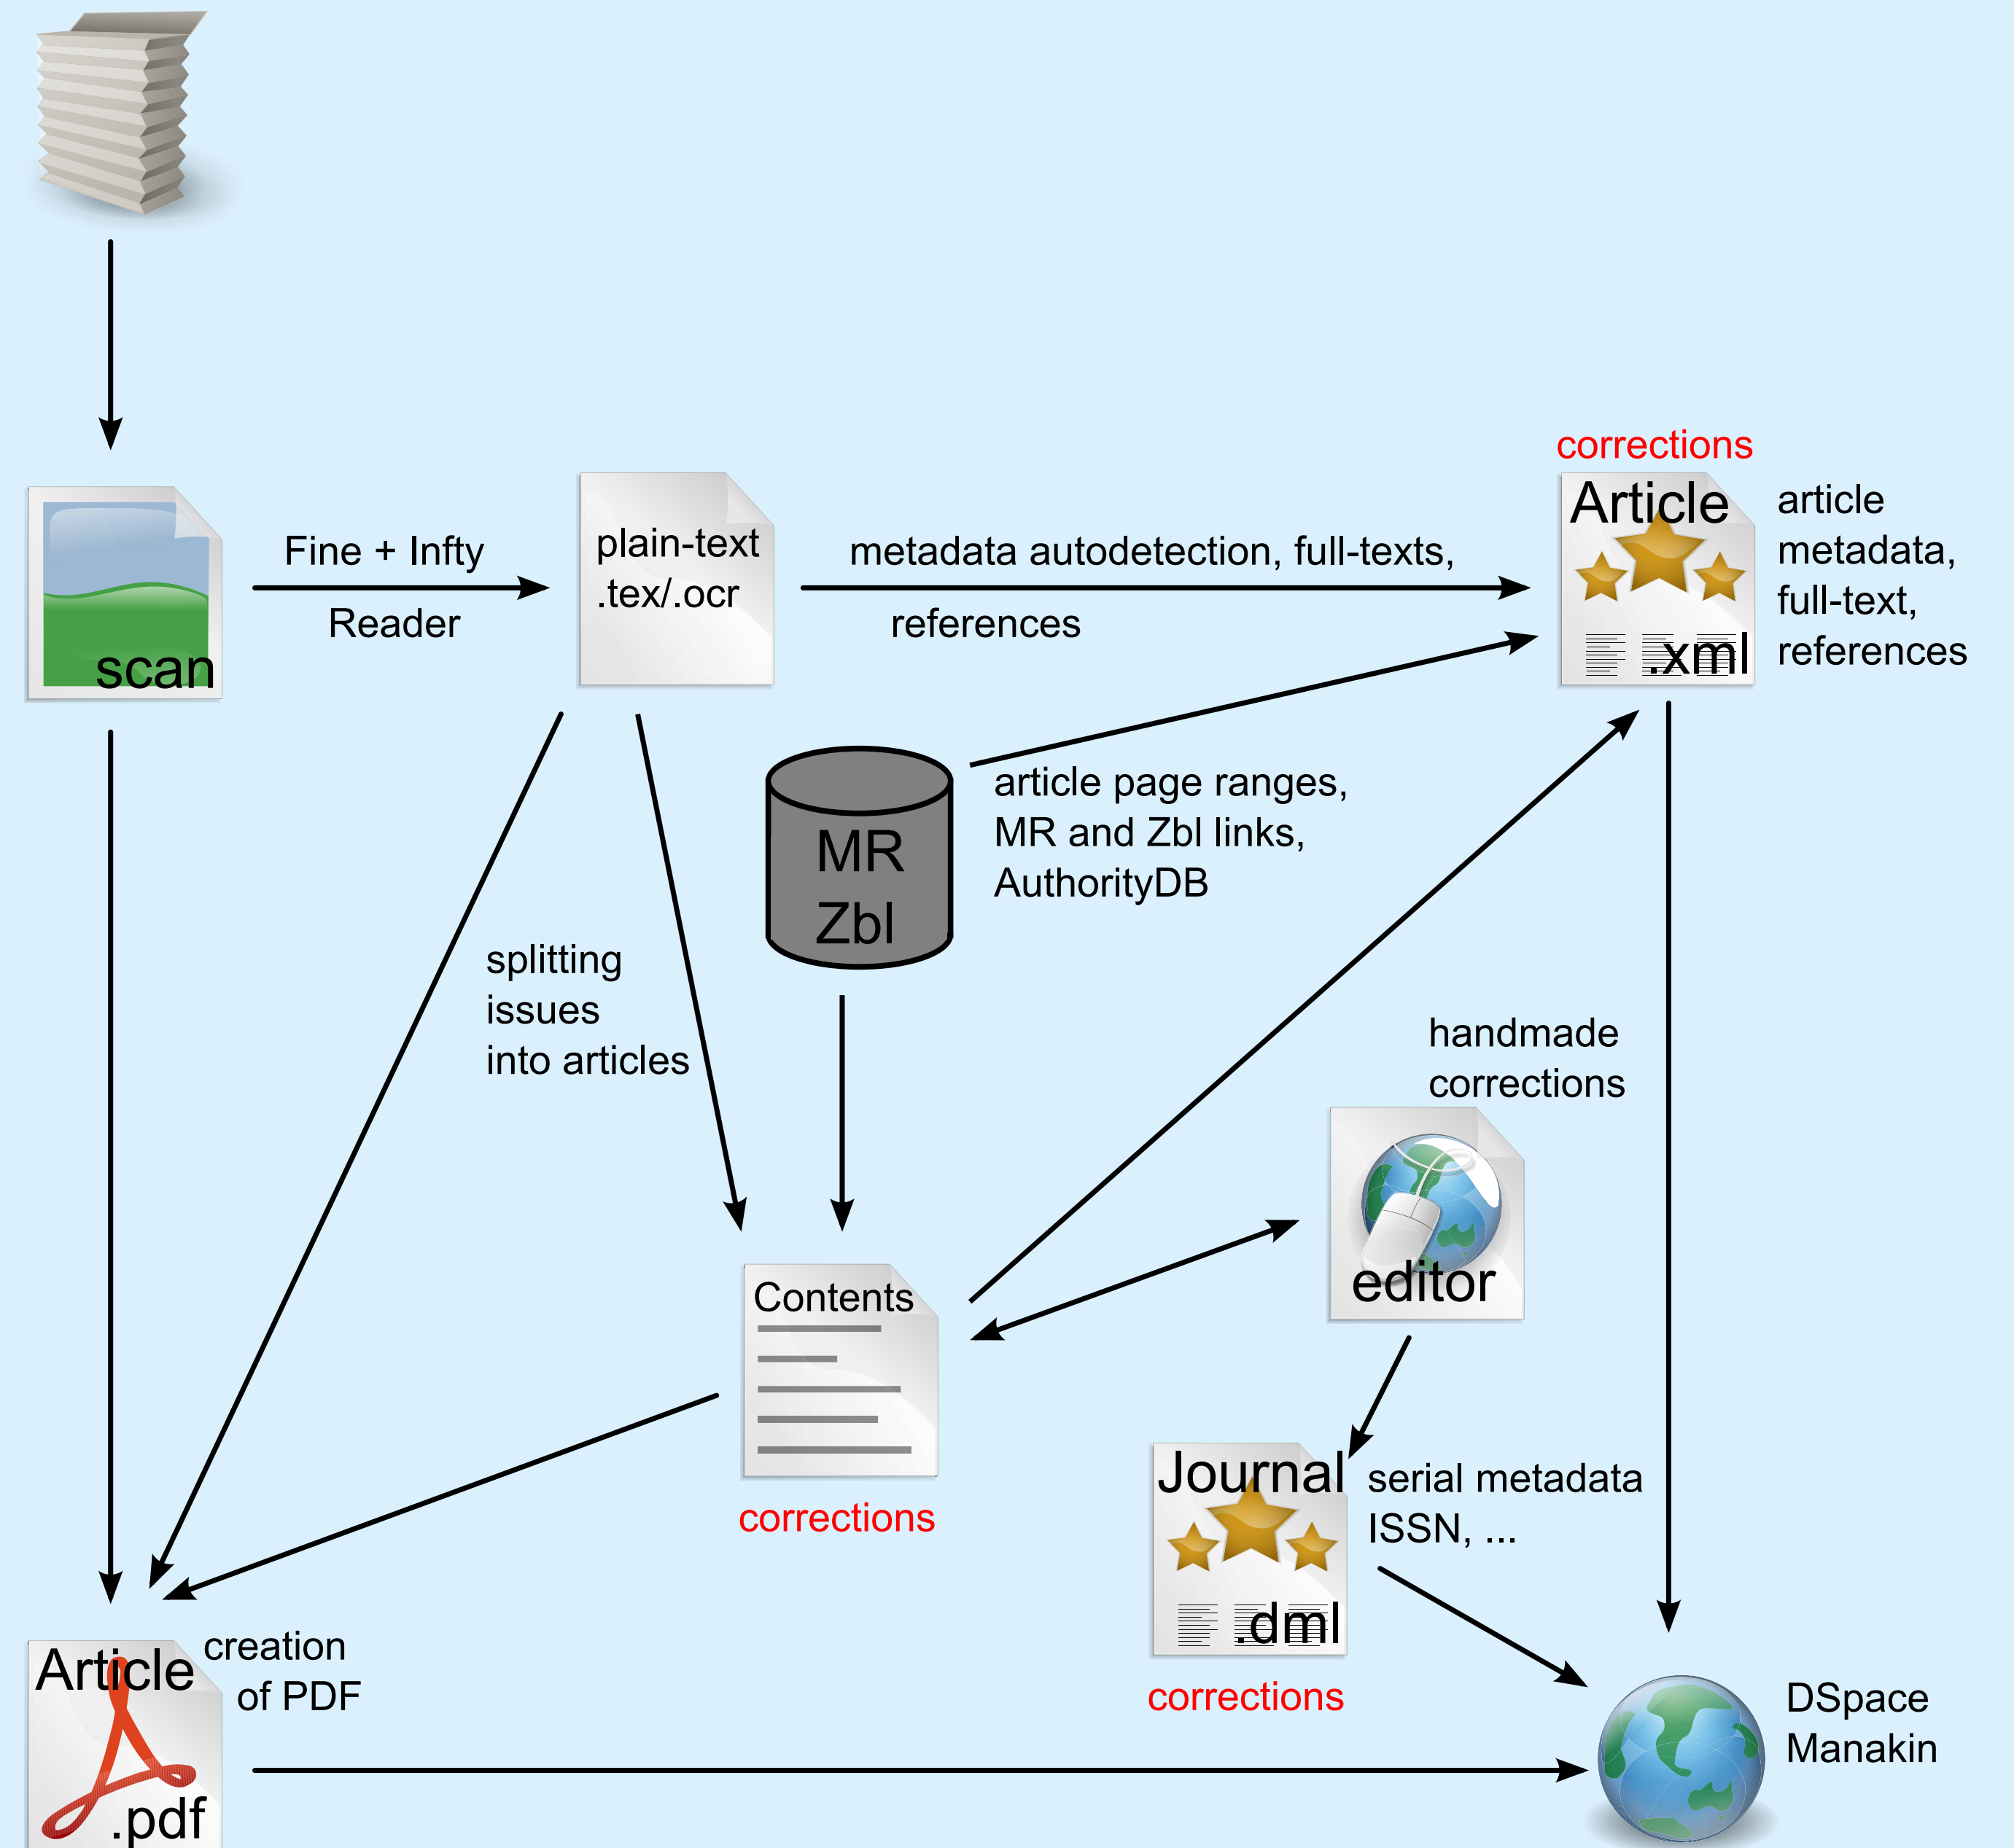

## Statistics

- ▶ 8 journals (2 already in DSpace), 19th – 20th century
- ▶ over 11 000 articles
- ▶ more than 148 000 pages

## From scanned images to articles

- ▶ building *Journal* → *Volume* → *Issue* → *Article* structure
- ▶ application of advanced OCR techniques (FineReader, InftyReader)
- ▶ autodetection of descriptive metadata from external databases (MathSciNet, Zentralblatt MATH) and/or from OCR
- ▶ manual correction of descriptive metadata
- ▶ references identification and processing
- ▶ generating PDF files on the article level
- ▶ export of articles and metadata into DSpace

URL: <http://dml.cz/>

## DML-CZ in DSpace Manakin

**DSpace** together with **Manakin** are the solutions that can meet our goal – to present DML-CZ to end users.

## DSpace

- ▶ DML-CZ structure
- ▶ *Journal* → *Volume* → *Issue* → *Article*
- ▶ imported into DSpace
- ▶ *Comm* → *Comm* → *Collection* → *Item*
- ▶ presented via Manakin

## Manakin

Two new artifacts:

- ▶ horizontal navigation
- ▶ *Previous* | *Up* | *Next*
- ▶ MSC (Mathematics Subject Classification) hierarchy

Almost all other things are done via XSL, JavaScript and CSS.
